

EXCEPTIONAL OUTCOMES

“The treatment is amazing and produced stunning results. We explained the rationale for the treatment to our family and friends who now realize this is about much more than a round head.”

Monica & Jonathan A.

Cranial Technologies® is the only company focused solely on pediatric head shape conditions. Our highly trained teams make it easy for parents to have peace of mind about their baby’s head shape.

Parents Find the DOC Band Experience® Exceptional.

We survey parents after treatment, because feedback is important to us. Our 2024 average NPS* Score was 87 — a level rarely seen in any industry — and almost twice the rating of the Healthcare category.

While we have maintained this high rating for over a decade, we continue our commitment to helping families — one baby at a time.

*NPS (Net Promoter Score) is a measure used to gauge customer loyalty and satisfaction. It is based on how likely customers are to recommend a company or product to others. Scores range from -100 to 100. A score above 50 is considered excellent, and a score above 70 is exceptional.

35+ YEARS

The Leader in Pediatric Cranial Shaping Orthoses®

EXPERIENCE DOC BAND THERAPY®

Proven treatment, expert care, and real outcomes. Discover why families trust the DOC Band®.

DESIGNED FOR THE BEST FIT

Every baby's head is unique, which is why each DOC Band® is carefully crafted through detailed assessments, personalized design, and ongoing adjustments to ensure optimal results.

CUSTOM FOR EACH BABY

Each DOC Band and therapy process is unique — individually tailored to each baby's needs to ensure optimal results.

DYNAMIC MONITORING

During DOC Band Therapy® the band is adjusted by our clinicians as the baby's head grows.

PRECISION MADE

Using our latest Sentient3D® and DSi® technologies, and a robust 21-point inspection protocol.

CLINICALLY PROVEN

Supported by independent pediatric research and trusted by medical professionals for over 35 years.

TREATS SKULL BASE

Corrects the cranial vault and skull base asymmetries simultaneously, ensuring optimal outcomes.

DOC Band®

EXPERT CARE EVERYWHERE

With over 100 specialized clinics nationwide, we are dedicated to providing expert care for your child. Treating plagiocephaly is all we do — we've been doing it for over 35 years.

- Our clinics are staffed by Physical and Occupational Therapists, Orthotists, and RNs with expertise in plagiocephaly treatment.
- Every Cranial Technologies® clinician completes 300+ hours of specialized training to ensure expert care.
- Our team monitors developmental milestones and identifies conditions such as neck tightness or torticollis.

ADVANCED 3D IMAGING

DSi® Technology is a proprietary Cranial Technologies® system that uses advanced 3D imaging to capture precise measurements of an infant's head, enabling an accurate assessment and custom treatment solution.

This proprietary technology ensures that each DOC Band® is perfectly tailored to correct the unique shape of every child's head, delivering a comfortable fit and optimal results.
