

THE TECH BEHIND THE RESULTS

The Difference is in The Process

Every DOC Band® is Designed, Engineered, and Manufactured In-House

Every baby's head shape is unique and so is every DOC Band. Our proprietary process combines advanced DSi® imaging, specialized design technology, and precision manufacturing to create a truly customized device for each patient. With more than 40 Years of clinical expertise and complete oversight throughout production, we are able to deliver the quality, consistency, and individualized fit families and providers trust.

1

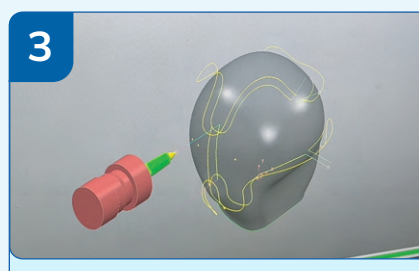

CAPTURE
Proprietary DSi imaging captures each baby's unique head shape.

2

DESIGN
Sentient 3D® applies corrective design parameters.

3

CUSTOMIZE
Contours3D™ software creates a truly individualized fit.

4

MANUFACTURE
Precision milling reproduces the digital model with sub-millimeter accuracy.

5

QUALITY
Our team ensures the final device matches design specifications.

6

SHIPPING
In-house manufacturing enables faster delivery and greater control of quality.

Why Providers Choose DOC Band

- Ensure consistent quality for your patients
- Complete product traceability
- Faster turnaround, your patients do NOT have to wait
- Optimal outcomes thanks to clinical expertise

Quick Appointment Availability

Early intervention leads to shorter therapy times and better outcomes. Our nationwide network means your patients won't wait long to be seen.

Real Results From Real Families

We know that every baby's journey is one-of-a-kind. While the DOC Band consistently delivers results, the pace and final outcome can be influenced by the baby's age, the initial severity of the head shape, and the consistency of the wear time.
