JANUARY

Let's Head into the
New Year Right!

Snow doubt
about it

Cool heads
prevail

Ice to
meet you

Every baby is one of a kind, just like a snowflake.

JANUARY 2026

So Sweet It's SUNDAY	Motivational MONDAY	Too Ready For TUESDAY	We Got This WEDNESDAY	We're Thriving THURSDAY	Thank Goodness FRIDAY	Let's Celebrate SATURDAY

FEBRUARY

All You Need Is Love!

Let's all band
together

Ooo baby,
baby

We're head
over heels

We heart babies, today and every day!

STRAIGHT FACTS ABOUT BABY HEAD SHAPES

~50%

of babies have some degree
or plagiocephaly or brachycephaly*

~25%

have moderate to severe
plagiocephaly requiring therapy**

3 MONTHS

is the ideal therapy starting age, or as soon as
a baby can hold their own head up by themselves

**EARLY INTERVENTION IS NOT ONLY JUST ABOUT APPEARANCE; IT'S ABOUT COMFORT AND SAFETY.
WITH THE RIGHT START, CHILDREN CAN FACE EVERY ADVENTURE AHEAD WITH CONFIDENCE.**

Some Frequent Factors of Head Shape Conditions

SLEEPING POSITION

Consistent back or side
sleeping can flatten
the skull.

PROLONGED DEVICE USE

Extended time in car seats,
strollers, and swings
limits movement.

TORTICOLLIS

Tight neck muscles cause
head tilting and pressure
on skull.

PREMATURE BIRTH

Softer skulls and extended
NICU time increase risk.

MULTIPLE BIRTHS

Limited womb space leads
to pressure on the
babies' heads.

LIMITED TUMMY TIME

Insufficient time on the stomach
causes prolonged pressure
on the back of the head.

CONGENITAL CONDITIONS

Conditions like craniosynostosis
require medical evaluation.

If plagiocephaly is present at 4 months, head band therapy such as DOC Band Therapy® is recommended.
The AAP endorses this recommendation. †

UNDERSTANDING HEAD SHAPES

What to Know and How to Identify

	MILD	MODERATE	SEVERE
PLAGIOCEPHALY Flat Surface This happens when a baby's head develops a flat spot on one side, making it look uneven. It is usually caused by a baby lying in one position for too long and it is quite common. (Example showing vertex view)	 <ul style="list-style-type: none">• Flattening is difficult to see	 <ul style="list-style-type: none">• Asymmetry is easy to see• Visible ear shift• Facial asymmetry may be present	 <ul style="list-style-type: none">• Asymmetry is obvious• Visible ear shift• Facial asymmetry• Front view: Unlevel head height
BRACHYCEPHALY Wide and Short This occurs when a baby's head becomes flat at the back, making it look wider and shorter than usual. It often happens when babies spend too much time on their backs. (Example showing side view)	 <ul style="list-style-type: none">• Minimal posterior flattening	 <ul style="list-style-type: none">• Back of head is flat instead of curved• Forehead slopes back• Posterior head height	 <ul style="list-style-type: none">• Head is short from front to back• From front view, bump above ear is the widest point of the head• Face appears small for the size of the head
PLAGIO/BRACHY COMBO Flat Spot / Wide Often plagiocephaly and brachycephaly go hand in hand. Many babies have a plagiocephaly-brachycephaly combo head shape, where the head is flattened on the back and also skewed to one side. (Example showing vertex view)	 <ul style="list-style-type: none">• Flattening is difficult to see	 <ul style="list-style-type: none">• Asymmetry is easy to see• Visible ear shift• Facial asymmetry may be present	 <ul style="list-style-type: none">• Asymmetry is obvious• Visible ear shift• Facial asymmetry• From front view, unlevel head height

IT CORRECTS

CUSTOM FOR EACH BABY

Each DOC Band® and therapy process is unique—individually tailored to each baby's needs to ensure optimal results.

DYNAMIC MONITORING

Each DOC Band is continually tracked and adjusted by our clinicians as the baby's head develops and grows.

PRECISION MADE

Using our latest Sentient3D® and DSi® technologies and a robust 21-point inspection protocol.

TREATS SKULL BASE

Effectively corrects the cranial vault and skull base asymmetries ensuring balanced head shape development.

CLINICALLY PROVEN

Supported by independent pediatric research and trusted by medical professionals for over 35 years.

DOC Band® by Cranial Technologies® is proven to address pediatric head shape conditions.

For over 35 years, the DOC Band® has helped correct pediatric head shape conditions through expert-led care and precise, research-backed processes. With over 400,000 babies treated, it's a trusted solution for measurable, lasting outcomes.

FIND A CLINIC

We have over 100 locations across the United States that share a singular focus — helping babies with head shape conditions. Our RNs, PTs, OTs, and Orthotists specialize in working with parents and pediatricians to achieve optimal outcomes.
